

A single call to your dedicated Chiesi Total Care Team is all it takes—we will guide you through the process of getting started on Elfabrio® (pegunigalsidase alfa-iwxj) therapy.

Insurance eligibility—Chiesi Total Care assists you with:

Commercial insurance

If you have private insurance through your job or your own business

Government insurance

If you have Medicare, Medicaid, Veterans Affairs healthcare, or other government insurance

No insurance

If you have no insurance, you may be eligible for financial assistance

Chiesi Total Care offers 2 copay programs for eligible patients*:

Prescription copay: This covers the medication itself. You may pay as little as \$0 for your Elfabrio prescription

Infusion services copay: This covers infusion supplies and administration (including home infusion). You may pay as little as \$0 for your Elfabrio infusion supplies and administration

Copay Assistance

To be eligible for these programs:

- You must be enrolled in Chiesi Total Care. (Enrollment and Authorization Form will be mailed to your home)
- You must have commercial insurance and a valid prescription for a US Food and Drug Administration (FDA)-approved indication for Elfabrio
- You must be a resident of the United States or one of its territories

Please refer to the accompanying full [Terms and Conditions](#) for additional eligibility requirements.

*Government-funded plans are not eligible for patient support services that provide financial support through the Programs. If you are receiving treatment or residing in MA, MI, MN, or RI, you are not eligible for infusion services. To receive home infusion support, you must be referred to home infusion by your prescribing physician.

Your dedicated *Chiesi Total Care Team* is made up of:

Pharmacists | Patient Service Coordinators | Reimbursement support | Nursing support | Patient education support

Infusion services[†]

- Chiesi Total Care clinicians can help you understand your medication and the infusion process and coordinate a suitable infusion site if needed
- If you receive infusions at home, Chiesi Total Care may be able to assist you, if eligible, with delivery of medication and infusion supplies

[†]If you are receiving treatment or residing in MA, MI, MN, or RI, you are not eligible for infusion services. To receive home infusion support, you must be referred to home infusion by your prescribing physician. Please see the full [Terms and Conditions](#) for additional eligibility requirements.

Routine testing[‡]

- Your doctor will provide support for globotriaosylsphingosine (lyso-Gb3) and anti-drug antibodies (ADAs) screenings, with no out-of-pocket costs if you have commercial insurance

[‡]If you are eligible for routine testing, the tests must be ordered by your prescribing physician. If you are residing or receiving treatment in MA, MI, MN, or RI, you are not eligible. Please see the full [Terms and Conditions](#) for additional eligibility requirements.

Additional Offerings

Indication

Elfabrio® (pegunigalsidase alfa-iwxj) is a prescription infusion medicine used to treat adults with confirmed Fabry disease.

Important Safety Information

What is the most important information I should know about Elfabrio?

Severe allergic reactions (hypersensitivity reactions), including anaphylaxis, may occur during and after Elfabrio treatment. If severe allergic reactions or anaphylaxis occurs during treatment, your healthcare provider will immediately stop the infusion and provide appropriate medical care. If these reactions should occur after treatment, seek immediate medical care.

What should I know about Elfabrio infusions?

Your healthcare provider may give you other medications prior to your Elfabrio infusions to help manage allergic reactions and infusion-related side effects. They will explain how to recognize the signs and symptoms of these allergic reactions and infusion-related side effects. If these signs and symptoms occur, it's important for you to seek immediate medical care. If the reaction is mild to moderate, your healthcare provider may choose to slow the infusion rate or withhold the dose.

In clinical trials, 41 patients (29%) experienced an infusion-related side effect. The most common signs and symptoms of an infusion-related reaction with Elfabrio were hypersensitivity, nausea, chills, itchy skin, rash, chest pain, dizziness, vomiting, feelings of weakness, pain, sneezing, shortness of breath, nasal congestion, throat irritation, abdominal pain, skin redness, diarrhea, burning sensation, nerve pain, headache, tingling or numbness, shaking movements, agitation, increased body temperature, flushing, slow heart rate, muscle pain, high blood pressure, and low blood pressure.

Your healthcare provider will do blood and urine tests to check your kidney function during treatment with Elfabrio.

The most common side effects of Elfabrio include infusion-related side effects, common cold, headache, diarrhea, fatigue, nausea, back pain, pain in the limbs, and sinus infection.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch or call 1-800-FDA-1088.

Please see accompanying Full Prescribing Information for Elfabrio and full Terms and Conditions for additional Chiesi Total Care eligibility requirements.
